

# 慶應言語学コロキウム

## A General Theory of *Wh*-Questions, Partial *Wh*-Movement and Related Matters

講師：外池 滋生 氏（ハワイ大学客員研究員、元明治学院大学教授、元青山学院大学教授）

司会・コメンテーター：内堀 朝子氏（東京大学） 北原 久嗣（慶應義塾大学）

日時：2022年6月4日（土）～5日（日）両日 13:00-18:00

※オンライン開催（Zoom 使用）・受講料無料／使用言語：日本語

In this talk I will examine various “partial *wh*-movement” languages so as to see if they fall within the purview of the general theory of *wh*-questions of Tonoike (2014, 2015, 2019, and in preparation), which claims that *wh*-questions all involve what is referred to as disjunction function in SpecCP where it is base-generated or raised by Internal Merge. The talk comprises of four parts. Part 1 will give an outline of the theoretical framework assumed throughout the talk. Part 2 claims that *wh*-questions in both English and Japanese involve a disjunction function based on cross-linguistic allomorphy between the two and other languages with respect to quantifiers and logical connectives. Part 3 gives an overview of so-called partial *wh*-movement languages, discusses the possible problems that they pose in view of the proposed general theory of *wh*-questions, and shows that in fact they fill the accidental gaps that the original theory contains. Part 4 discusses various related problems, tying up loose ends, including an account of *kakarimusubi wh*-questions.

スケジュール：

Day 1

13:00-15:00 Part 1. A General Framework (Tonoike (2019, Tonoike (in preparation)))

15:15-17:15 Part 2. A General Theory of *Wh*-Questions

17:30-18:00 Discussion

Day 2

13:00-15:00 Part 3. Partial *Wh*-movement/*Wh*-Expletive/Scope Marking languages

15:15-17:15 Part 4. Related Matters: Tying Up Loose Ends

17:30-18:00 Discussion

[参加申込] [genbu@icl.keio.ac.jp](mailto:genbu@icl.keio.ac.jp) 申込締切: 6月2日(木)

- ・氏名、所属、職位(学部・専攻・学年)を明記の上、メールでお申込ください。
- ・申込者へは、事務局より別途オンライン開催情報を返信いたします。
